Lean Startup

- Listen to this presentation: E. Ries: The Leans Startup.

Lean startup

Frequently misunderstood things:

- How lean startup defines startup.
- Lean startup and lean software development are distinct notions. One of the precursors of Lean startup is lean manufacturing.
- Minimal viable product as defined by lean startup is a significantly different compared to the traditional notion of minimal viable product.
- Lean software development has strong connections with agile, it is often regarded as subculture of the agile community.
